

Professor Khalifa S. Al-Jabri, PhD, FICE, F.ASCE, FOSE
Department of Civil and Architectural Engineering
Sultan Qaboos University
Oman

Prof. Al-Jabri obtained his BSc in Civil Engineering from Sultan Qaboos University in 1991 and MSc and PhD degrees from The University of Sheffield, UK in 1993 and 2000, respectively. After obtaining the PhD, he joined the Department of Civil and Architectural Engineering as an Assistant Professor and in 2006, he was promoted to an Associate Professor and appointed as the Assistant Dean for Postgraduate Studies and Research in the College of Engineering. In 2011, he was promoted to a Professor and appointed as the Head of the department of Civil and Architectural Engineering until September 2017. He served as member in the State Council of Oman from 2011-2015. He was ranked among World's top 2% scientists in the field of construction and building published by Stanford University in 2020.

In 2015, he received the Best Researcher's Award from Sultan Qaboos University and He was elected as a Fellow member (FICE) of the Institution of Civil Engineers (ICE), UK and Fellow member of the American Society of Civil Engineers (ASCE), USA in 2018 and Oman Society of Engineers. He also received the Distinguished Scientist Award from Venus International Foundation in 2016 and the pioneer Engineer's award from the Gulf Union of Engineers in 2017. He is member of trustees of the Arab Commission for Accreditation of Engineering and Technology as well as chairman of the Education Committee in the Federation of Arab Engineers. Prof. Al-Jabri was ranked among the World's Top 2% Influential Scientists and researchers in the field building and construction according to the study by Stanford University and Scopus in 2020.

His research interest is focusing on four areas: 1) studying the behavior of materials and structures at elevated temperatures, 2) Investigating the potential use of waste materials and industrial by-products in civil engineering application, 3) Seismic hazard assessment of Oman. 4) Use of sustainable construction materials

Prof. Al-Jabri has published more than 200 articles in well-refereed journals, conferences and technical reports. He served as principal investigator and researcher in about 31 research grants and consultancy projects. He is member in the editorial board and reviewer in 11 and 47 scientific journals, respectively. He supervised a

number of postgraduate students and served as an external examiner for a number of MSc and PhD students locally and internationally. He attended many international conferences and he was invited as a keynote and invited speaker to many conferences and workshops. He organized and was member in the organizing and scientific committees of many local and international conferences. He evaluated many academic promotion cases, research grants, academic programs for some academic institution locally and internationally. He served as chair and member in many committees in the University and national levels.

His outstanding scientific achievements have been reflected on the number of citations and the h-index which reached around 2800 citations (with h-index of 29) in google scholar and more than 1700 citations (with h-index of 24) in Scopus index. Some of his articles that published in the Journal of Constructional Steel Research were among the top 25 of the most cited articles.
